

Minimum Quality Standards

It is important that all employers within the National Recruitment Scheme are committed to providing a high quality training experience. For this reason we will require employers who sign up to commit to complying with the following:

- Disclosure and Barring Service Checks (DBS) for the preregistration pharmacist.
- All preregistration pharmacists to complete Equality & Diversity, Safeguarding Vulnerable Adults and Children and Information Governance training appropriate to the role being undertaken.
- All trainees will work to an approved GPhC Preregistration Pharmacist Training Plan. Employers should offer a training plan that is mapped to the performance standards and delivers the section 10 outcomes from the future pharmacist standards.
- All trainees and their tutors will sign a GPhC Learning Agreement
- All preregistration tutors must comply with the [GPhC Tutor Guidance](#)
- All preregistration pharmacists will be provided with dedicated time each week for development e.g. study day, intra- and interprofessional development, shadowing and reflection
- The employer must have undertaken a patient satisfaction survey or in patient survey (or equivalent, as relevant to the patient care setting) in the last 12 months.

Compliance with these requirements will be monitored by the NWSSP, Workforce Education and Development Service through its quality management procedures. Failure to comply may result in an employer being withdrawn from the scheme in subsequent years.

*For further information on local preregistration pharmacist tutor training programmes, please contact the Wales Pharmacy Lead Michele.sehrawat@wales.nhs.uk

To be completed by an authorised signatory on behalf of the employing organisation

I confirm on behalf of the employing organisation listed below that we agree with the statements listed above:
